ALITA Maritime

"Fleet intelligence & AI superintendent copilot."

Stop digging through ship inboxes. Start commanding your fleet.

ALITA decodes ship emails, bunker soundings, PDF surveys, and BAPLIE stowage plans into a **private, sub-second fleet dashboard.**

The superintendent's inbox nightmare

- Critical engine warnings get buried in **250–700 daily ship emails**.
- Fuel ROBs, class surveys, and hazmat cargo sit locked inside unindexed attachments.
- Superintendents waste hours every week compiling manual fleet status reports and owner updates.

Reads inside every ship file

- Extracts **Excel bunker soundings**, PDF surveys, and raw **BAPLIE EDI** bayplans.
- Reconstructs broken satellite email threads and auto-tags vessels & voyages.
- Generates structured **weekly fleet status & technical reports** in 30 seconds.

<50ms	Sub-Second Search Across Emails & Attachments	**30 Secs**	1-Click Weekly Fleet Status Reports	**0 Cloud**	Optional: 100% On-Premises AI

Live bunkers & BAPLIE hazmat

- Tracks **LSFO & LSMGO bunker balances** and flags refueling events automatically.
- Decodes BAPLIE files into TEU counts, reefer bays, and **IMDG dangerous goods**.
- Filters out automated system noise so only genuine operational traffic appears.

MV ACME TRADER • Voy 252N LIVE STATUS

Bunker ROB (LSFO / MGO)	342.5 MT • +350 Bunkered
BAPLIE Hazmat (IMDG)	12 Units (Class 3 & 9)
Weekly Fleet Report	✓ Ready in 30s

"Did ACME TRADER load any dangerous goods on Voyage 252N?"

Yes. Per BAPLIE bayplan **[Source A19]**, 12 IMDG containers were loaded at Singapore: 4× Class 3 Flammable Liquids and 8× Class 9 Lithium Batteries **[Email #712]**.

Stream BAPLIE #19 | Open Email #712

100% private, cited fleet AI

- Every answer links directly to the **exact ship email & attachment**.
- Runs 100% inside your firewall—charter terms and bunker rates never touch public clouds.
- Streams email attachments on demand with zero local disk bloat.

Superhuman visibility for shore teams

Proven on 1,150+ real ship transmissions & 600+ technical attachments

Tech Superintendents
Cut daily inbox admin 70% & automate fleet reporting

Fleet Ops Directors
Sub-second search across all ships & voyages

DPAs & Safety
Instant IMDG hazmat & class condition tracking

Maritime IT & CIOs
On-prem local LLM with zero cloud data leaks

ZERO-FRICTION FLEET ONBOARDING

Set a simple mail copy rule. ALITA does the rest automatically.

Just set a rule in your mail system to copy vessel traffic to ALITA. It continuously ingests all ship mail, daily reports, and technical attachments into a live, searchable fleet dashboard.

1. Set Mail Rule → 2. Auto-Index All Ship Mail →
3. 1-Click Fleet Report
