Vessel Chat

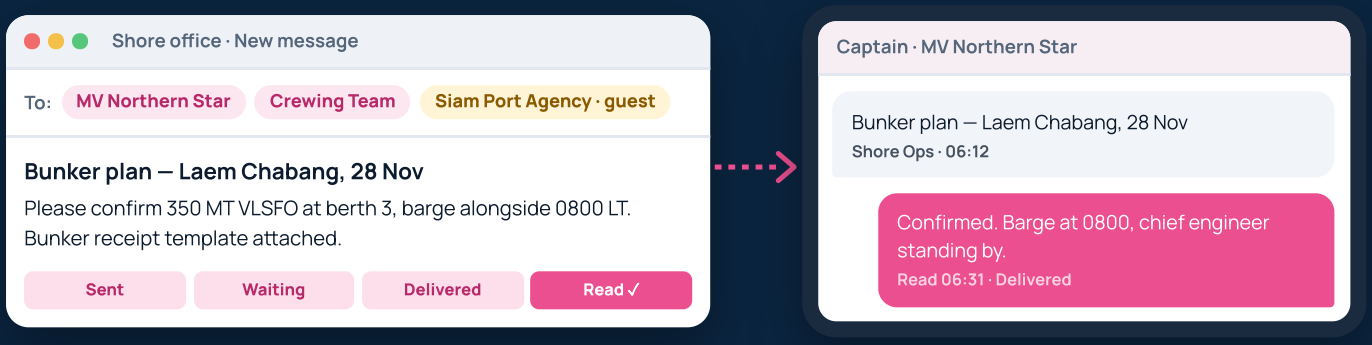

"The private ship-shore inbox that shows what was delivered."

SHIP-SHORE OPERATIONAL MESSAGING · VESSELCHAT.CHAT

Ship-shore messaging without the delivery guesswork.

Bring shore operations, captains and port agents into one private Fleet Space. Message a ship, a department or an agent —and see exactly when it was delivered and opened.

> *"Did the captain actually get your voyage instructions—or are you just hoping they did?"*

THE OPERATIONAL DILEMMA

How many satellite calls this week just to ask "Did you get my email?"

	Email	WhatsApp	VesselChat
Know it reached the ship and was opened	✕ Guess	~ Ticks only	✓ Delivered & Read
Address the ship, not a personal number	~ Shared box	✕ Phones	✓ Vessel → master
Agents see only the thread they're in	~ CC chaos	✕ Whole group	✓ Single thread
History stays with the company	✓	✕ Leaves with crew	✓ Fleet Space
Attachments screened for malware	~ Varies	✕	✓ Before download

TRUTHFUL DELIVERY TRACKING

Real acknowledgements, not vague ticks.

1. **Sent** — Stored securely on the server the moment you press send.
2. **Waiting for recipient** — Queued safely while the ship is offline or between satellite handoffs.
3. **Delivered** — Received by the recipient's authenticated device.
4. **Read** — The recipient opened the message. No more chasing.

$29 / mo
per Fleet Space, 10 users included

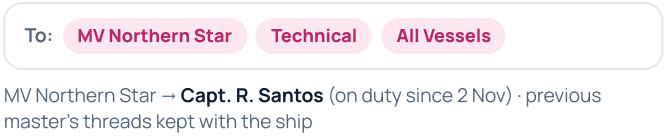

No vessel tax
Ships aren't billed—captains are simply users

Free guests
Port agents and suppliers never use a paid seat

OPERATIONAL ADDRESS BOOK

Address ships and teams, not phone numbers.

Type a vessel, a department, **All Vessels** or a person. A vessel resolves to the master on duty—so crew changes never break thread history or leak past files.

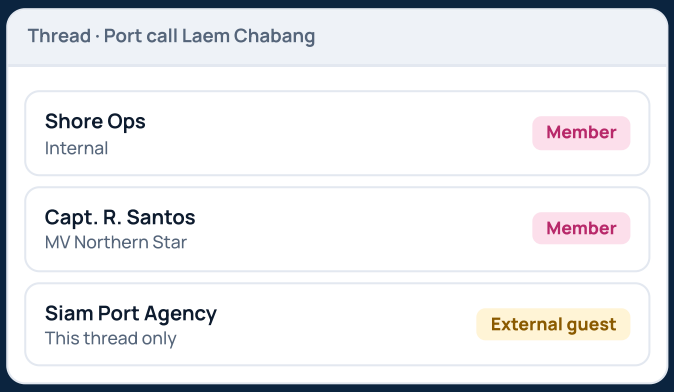

MV Northern Star → **Capt. R. Santos** (on duty since 2 Nov) · previous master's threads kept with the ship

SAFE EXTERNAL COLLABORATION

Bring agents into the loop without exposing your fleet.

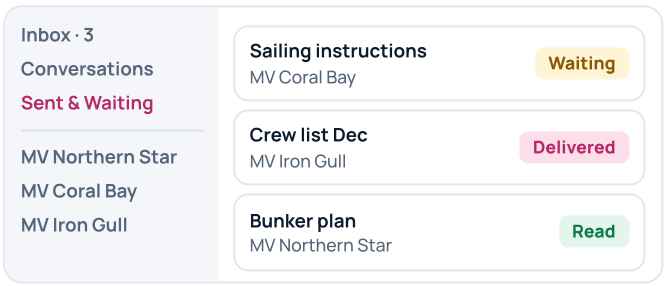

Invite a port agent, surveyor or supplier with a single-use secure link. They read and reply to that one thread—never your vessel list, internal channels or company discussions.

ONE CLEAR OPERATIONAL INBOX

Who hasn't acknowledged yet?

- **Inbox, Conversations, Sent & Waiting** — unread work, searchable history, and what is still awaiting a read.
- **Vessel filters & personal folders** — one click per ship; file work into "Drydock 2026" without changing who sees what.
- **Protected attachments** — crew lists, stowage plans and PDFs malware-screened before download.

SIMPLE PRICING

$29 / month

per Fleet Space

- ✓ 10 internal users included
- ✓ $3 / month per extra user
- ✓ Unlimited vessels—no vessel tax
- ✓ Free external agent & supplier access

"We already use WhatsApp."

Company messages get lost and leave with the crew. VesselChat is an owned, private Fleet Space where history stays with the ship.

"We manage everything by email."

Keep email for formal notices. VesselChat replaces the 40 quick operational emails a day—and shows when each was delivered and opened.

"What if the ship is offline?"

The message is stored and marked **Waiting for recipient**. It delivers automatically when the link returns.

30-DAY PILOT · ONE WORKFLOW

Still waking up at 3 AM wondering if your ship got the bunker plan?

Connect one ship and your shore desk. Run noon reports, bunkers or port calls through VesselChat for 30 days.

Stop guessing. See it delivered.
